

Trustteam – Cybersecurity & Network Infrastructure Engineer (Staffing)

An exciting career opportunity awaits a professional who thrives in safeguarding digital environments, optimizing network ecosystems, and driving operational excellence within a fast-paced international organization.

Key Responsibilities

Cybersecurity Operations

- Continuously track, evaluate, and respond to emerging security threats and incidents.
- Administer and optimize firewalls, endpoint security tools, and IDS/IPS platforms.
- Perform regular vulnerability assessments, interpret findings, and apply remediation actions.
- Develop, implement, and uphold security standards and frameworks (ISO 27001, NIST).
- Assist with compliance initiatives, including audit preparation and GDPR-related requirements.
- Oversee user access governance, identity lifecycle management, and privileged account controls.

Network Infrastructure Management

- Support and troubleshoot corporate network environments including LAN/WAN, VPNs, Wi-Fi, and segmented networks.
 - Configure and maintain core network equipment (switches, routers, firewalls from vendors such as Cisco or Fortinet).
 - Monitor and enhance network stability, availability, and performance through proactive oversight.
 - Participate in the planning and execution of network improvements and architectural evolutions.
-
- Degree in Computer Science, Information Security, or equivalent professional experience.
 - Minimum 5 years of hands-on practice in cybersecurity and network administration.
 - Strong familiarity with firewalls, endpoint defense, SIEM solutions, and IDS/IPS technologies.
 - Solid networking skills including VLANs, routing/switching, and VPN configuration.
 - Certifications such as Security+, CEH, CISSP, CCNA Security, or Fortinet NSE are advantageous.
 - Comfort working in Microsoft and Linux environments; exposure to Azure or AWS is beneficial.
 - Analytical mindset, strong troubleshooting ability, and a proactive attitude.
